Attention Athens-Clarke County Residents:

My name is Dr. Conor Fair, and I am a postdoctoral researcher in the Entomology Department at the University of Georgia. I am inviting you to take part in a research study.

I am researching pollinators and opinions related to residential yard management including landscaping and gardening that affects pollinators. The survey will ask you about your personal views and behaviors relating to pollinators and residential yard management. I am looking for Athens residents to participate in the survey. Any prior knowledge or interest in pollinators or residential yard management is not required for this survey.

If you agree to take part in this study, you will be asked to answer the questions in the survey. The survey will take approximately 10 minutes to complete. Please complete the survey by yourself and not more than once. Participation is voluntary. You can refuse to take part or stop at any time. The URL and QR code included below will provide you access to complete the survey using a computer or mobile device.

Your responses will help us understand how to better support pollinator conservation. This research will help contribute to the mission of the University of Georgia to foster research, teaching, and extension.

Thank you for your participation. If you have any questions about this research, please feel free to contact me at cfair13@uga.edu.

Sincerely,

Dr. Conor Fair

Postdoctoral Research Associate
